- Published $\rightarrow$ 1924.

No. of Cards $\rightarrow$ 305, L.D. Dhawale says 319.

Four Grades $\rightarrow$ NUX-V, Nux-v, Nux-r, Nux-v.

Total medicine $\rightarrow$ 250

$\rightarrow$ Rubrics are arranged alphabetically.

First card is ACHING, last one YELLOW.

$\rightarrow$ Cards are punched.

$\rightarrow$ Most of the cards have rubrics which show general character or some particular complaints.

$\rightarrow$ Most of the rubrics are similar as mentioned in Synoptic Key, even the number of medicines and grades are same at times.

$\rightarrow$ Rubrics are taken from "Conditional Aggravation and amelioration" and Generalities from Synoptic Key.

* The Card repository has become out of use because of synoptic Key BBK which contains more medicines and rubrics.

How to work out a cure?

$\rightarrow$ Cards are arranged as per the hierarchy of symptoms, worked out by Bogeri's method.

They are arranged one after another.

$\rightarrow$ Looking out the hole against light, the indicated medicine or group of medicine can be found automatically.
