Gradation → 3: Bold, italics, Roman

Edition → 2, (1879, 1884)

Introduction

Book contains experience from his professional colleagues especially India, and also the therapeutics of typhoid, typhus, and fever of every grade and name, from acute, sporadic, epidemic intermittent to any malignant fever.

Philosophical concept

- * Though he says different fever, it is the individual has to be treated not fever.
- * Family history is of more importance than rapid pulse and high temperature.
- * He says any fever at any stage can be cured if totality is formed correctly.
